

# MATTRESS CARE INSTRUCTIONS

## OPEN IT

Go ahead, you know you want to. Unroll that mattress! To open correctly, carefully cut open the plastic bag and watch the magic happen! Allow your Keetsa a couple of hours to expand before using. It should take a couple of days for your Keetsa to reach its full potential. Notice a scent? Don't worry, it dissipates quickly and does not contain harmful VOCs.

## PLACE IT ON YOUR FOUNDATION

Seems simple enough, right? Well, just in case, here are few essential points: First, place the mattress right side up. The name, "Keetsa," should be right-side up and visible at the foot of the bed. Make sure you are placing your Keetsa on an "approved foundation." That means either a Keetsa Steel Foundation, a slatted platform bed (with slats no more than 2" in width and no more than 4" apart) or an existing box spring that is in good condition and does not flex. A good way to test if you box spring works with a Keetsa mattress is by pressing on it and making sure it is ridged. If it flexes, please contact us for other options. Other non-acceptable options would be things like the floor, a solid, non-breathable foundation, a Murphy bed or adjustable foundation.

## SLEEP EASY

That's it! You are now ready for a great nights sleep. Over time some natural softening to the top surface will occur. This is normal. To evenly wear the mattress, simply turn the mattress head to toe once every 6 months. In addition, we recommend a Keetsa mattress protector to keep your new mattress clean and performing well for years to come.

## MATTRESS CLEANING

KEETSA MATTRESS COVERS ARE NOT REMOVABLE OR WASHABLE - despite the presence of a zipper on some models. If you happen to stain your mattress, it is best to spot clean the area using a small amount of warm water and mild detergent. Use extra caution not to get the foam layer wet; this can damage the foam. Most importantly, make sure the cleaned area is completely dry before adding your bedding. You can use a hair dryer to dry the area off more quickly. If you need to clean a larger area or the entire mattress, please contact a furniture/mattress cleaning professional.

# HOW TO HANDLE YOUR NEW KEETSA PURCHASE

Your new Keetsa mattress is packaged in a convenient, easy to move box outfitted with wheels to assist you in moving the box. Because of its weight, please use caution when transporting and moving the box. The Keetsa Mattress Box has wheels that are designed to help you get your new mattress into your house from your car, and are not designed to transport the mattress over a long distance.

Your mattress is heavy and caution should be used when rolling the mattress box across flooring surfaces. Avoid pulling the box wheels across easily scratched or dented surfaces, such as (but not limited to)

- wood floors • tile • slate
- granite • linoleum • painted floors

We recommend two people lifting the mattress box across such surfaces. The box is also outfitted with handles that allow two people to lift the mattress in situations such as stairs or over long distances. Please, always use proper lifting techniques to avoid injury.

Your Keetsa products are packaged in cardboard printed with water soluble inks and are recyclable. We encourage you to recycle or reuse your Keetsa cardboard packaging. Wheeled boxes make for great storage or moving boxes.
